Chief Patron's Foreword

Dear esteemed COMHAD Members,

The publication of the Directory of the Commonwealth Association for Health and Disabilities (COMHAD) is a matter of great historical importance. Publication of Directory of any organization make the organization self evident to anyone who would be keenly interested in its activities.

After 25 years of intense activities for the improvement of health of the disabled and rescue asphyxiated new born babies at the grassroots level while the organization functioned as CAMHADD (Commonwealth Association for Mental Health and Developmental Disabilities), further three years have been added to its history with new realization of appreciation for the disabled and thus the organization renamed as COMHAD.

The Directory will enable us to know all our members, help to communicate with each other and will lay the basic foundation of the organization which will be of great importance to give it instantaneous introduction at international and individual levels.

I have a very deep sense of appreciation for those who have worked hard to bring out the Directory and congratulate them for their very sincere endeavor to raise COMHAD to a new height of committed Commonwealth Organization for the cause of health and humanity.

I am pleased to know that COMHAD is releasing its directory.

'Directory' historically has many meanings; but the book 'Directory' should play a significant role in the profession, community and politically too. The 'Directory' though it is a book containing an alphabetical listing of names, addresses and telephone numbers; however, in this digital era it must also include one's Social Media accounts like Facebook, Twitter, Instagram etc.

'Directory' specifically is meant not only for a group of people, but it now covers the industries, institutions and such other entities. Today Directory is playing a major role especially for professional bodies and politicians. In the past it also contained rules and regulation and directions given by the Board of Directors of an organization, Churches and Temples, for example.

'Directory' started as a 'French Directory', by a group of five powerful people in France in 1795 who were ruling until their authority was ceased by Napoleon in 1799. However, the name 'Directory' was adopted in the 19th Century to list the names of buildings and blocks which had a board of directors to run and maintain. It also contained rules and regulations to follow. One may call it as a book of facts and therefore- a reference book.

'Directory' for an organization like ours, COMHAD, in my opinion must also include an outline of rules and regulations to follow. Should also contain upcoming major events and programs that are meant for promoting the needs for the physically, mentally and visually challenged or in lay terms 'Disabled', the phrase that should be removed from the modern dictionary.

'Directory', that the COMHAD Organization is bringing out should set an example for the others to follow. It must be made a socially prominent and acceptable too. It should be digitally available with full data that will not only be useful to the individual whose name is included but also to those whose names are not there & provide information and must be freely used for communicating.

'Directory', therefore, must serve the point of view of the organization. It should incorporate the directions and instructions given by the Executive Body to educate the members to be groomed to run the organization now or in future. The future generation must, thus be benefited who should refer the directory for guidance.

I wish good luck to all.
